

GIOVANNA

Sovereign Healing Cosmology

What Is Giovanna?

Giovanna is a parent-led therapeutic intelligence platform - a Progressive Web App (PWA) built for families raising neurodivergent (autistic) children. It transforms everyday parent observations into dignity-centered documentation, bridging the deep expertise parents hold at home to the institutional systems - schools, therapists, and clinics - their children navigate.

Rather than pathologizing behavior, Giovanna uses strength-based language, treating a child's behavior as communication rather than a problem to be fixed.

Core Philosophy

Zero-Knowledge Architecture: Family data stays private and never leaves the device unless the parent explicitly chooses to share it.

Epigenetic Consciousness: A child's nervous system heals through relational reciprocity (parent-child connection) and a predictable, safe environment.

Dignity Refraction: Deficit language is transformed into strength-based narratives that honor the child.

What It Does

- **Sanctuary:** Home dashboard with a responsive atmosphere reflecting the family's emotional state.
- **Capture:** Log observations via voice, text, or video in the moment.
- **Oracle:** AI that reframes deficit language into strength-based narratives.
- **Skills Tracker:** ABA-informed skill building and milestone tracking.
- **Memory:** AI pattern recognition across observations over time.
- **Progress:** Analytics and shareable PDF reports for therapists and schools.
- **Therapy Prep:** Prepare for sessions with relevant observations and questions.
- **Practice:** Role-play games (Playbook) and family mantras for consistency.
- **Wellness:** Caregiver self-care, burnout detection, and daily check-ins.
- **Vault & Passport:** Secure storage for IEP, FBA, and clinical documents; smooth care transitions.
- **Village & Community:** Connect with care teams and other parents.
- **Legacy Center:** Long-term continuity and emergency planning for the child's lifetime.

Technology

Built with React 19, TypeScript, Firebase, and Tailwind CSS; deployed on Vercel. Giovanna features a distinctive 'Liquid Glass' frosted-glass visual design and works offline as an installable Progressive Web App.

"Giovanna helps parents of autistic children turn daily moments into meaningful, dignity-centered records -

*supporting the child's growth, the parent's wellbeing, and communication with the professionals in their lives,
all while keeping family data private."*
